Parents' Questionnaire for Check-up U7 (age 22-24 months)

Dear parents

As parents you are able to help identify developmental problems in your child at an early stage so that these can be treated. Watch the development of your child carefully in order to recognise possible developmental delays.

Please answer the following questions and bring this form together with the yellow check-up booklet to your appointment.

Please remember that a single, unusual reaction does not necessarily mean that there is a developmental problem with your child.
